"Forest"

The activities used as an assessment for children are below:

1. Checking questions

The student will be given a table of statements which will be needed to be checked if the corresponding statement is correct based on the played video. and from this activity I will know if they pay attention to the video that has been displayed on the class.

2. Playing Word games

The student will pick a card and then draw lines as how long the letter

is, then the other student will try to guess the word using letters, the

material will be from the video. for an example \_\_\_\_\_ for Rabbit and the 3 student with the most point from 15 word will get prize, this way we know that they know the words from the lesson.
